INTRODUCTION

What do we do?

Speeds Healthcare provides medicines management solutions to the UK independent healthcare sector, including supply of product and on-site clinical pharmacy support.

Through our nationwide network of specialist clinical pharmacists and bespoke software technology we help clients to comply with healthcare regulations and best practice requirements regarding medicines management.

Our mission is to improve outcomes for our patients, clients and healthcare professionals.

Who are our clients?

We have a very diverse range of clients representing many different sectors, such as mental health hospitals, ophthalmic hospitals & clinics, addiction clinics, specialist schools, podiatry clinics, homecare services, nursing & residential homes etc.

Who are Speeds Healthcare?

We provide optimum solutions based on our experience of over 35 years supporting the independent health and social care sectors and are experts in medicines management.

Our wholesale facility and automated dispensary are situated at Chester from where we distribute supplies nationwide.

Our supply hub is supplemented by our team of specialist clinical pharmacists who are located within easy reach of our clients' premises.

PRODUCT SUPPLIES

Speeds Healthcare are a registered Pharmacy with the General Pharmaceutical Council and possess an NHS contract for the supply of prescriptions. We are also a licensed Wholesale Dealer with the MHRA and possess a Home Office Controlled Drugs Licence.

Speeds Healthcare has a proven track record of experience and expertise in high volume medicines supplies. Our default courier delivery service is guaranteed next working day pre-noon, although urgent same-day deliveries are available if needed.

As a leading supplier to the independent healthcare sector, we can provide the optimum solution for product supply to your organisation.

Wholesale Supplies

eMeds is our online ordering platform for fast and efficient ordering of your stock medicines. Your personalized account keeps a track of orders placed and enables easy repeating of previous orders, just like your supermarket shopping!

We maintain a vast range of pharmaceuticals including many specialist medicines and controlled drugs.

Prescriptions

Through the utilisation of robotics in our pharmacy we can ensure the accurate and efficient dispensing of medicines.

NHS prescriptions can be received via the NHS digital electronic prescription service. Our innovative **eScript** application can be utilized for the transmission of private prescriptions.

Healthcare Consumables & Medical Equipment

From our e-commerce website, **SpeedsMedical**, you can order everything from cotton wool balls to ECG machines, providing a one-stop shop for all your healthcare needs.

INNOVATIVE DIGITAL SOLUTIONS

Insight®

Insight® is the 'must-have' medicines management tool, unique to Speeds Healthcare, that helps manage risk and improve outcomes.

The interactive communication portal provides 24-7 access to information from our specialist pharmacists and is available from any device without any complicated IT install. Clinical interventions, actions for regulatory compliance, drug recalls etc., are visible to all relevant staff.

Insight® reduces errors and provides evidence of improvement and quality processes for regulators. Furthermore, the trend analysis and site-to-site benchmarking available from the powerful **Insight® Analytics** provides invaluable data for senior management teams.

eScript

eScript is another app, unique to Speeds Healthcare, that enables prescribers to securely send paperless prescriptions directly to the pharmacy.

With anytime, anywhere, access **eScript** liberates working practices for prescribers and saves time from the tedium of handwriting prescriptions.

eScript also reduces errors as prescriptions are compiled directly from the digital prescription history for each patient.

Huge efficiency savings are available as repeating previous prescriptions is so easy. Furthermore, the laborious process of faxing and posting prescriptions is entirely eliminated as prescriptions are securely digitally transmitted direct to the pharmacy.

SpeedsLink

SpeedsLink is the portal through which all our digital solutions are available, including access to **eMeds**, for online ordering for your stock medicines, and **SpeedsMedical** for the online ordering of medical consumables and medical equipment.

PHARMACY SUPPORT SERVICES

Whatever your needs in managing medicines, we will have a solution and will support you every step of the way. Whether that be remotely via our medicines' information hotline, or face-to-face via your nominated ward pharmacist who visits you weekly.

Medicines Management

The handling and use of medicines is a high risk activity in any regulated environment. Our recommendations and documentation systems will support you with best practice and safe working practices through implementation.

Each week your visiting pharmacist will be working to help you achieve and maintain regulatory compliance, and utilising **Insight**[®] will document and record the actions you need to implement.

Clinical Support

Our pharmacists get really excited about the optimal use of medicines. It may be by having a 1-to-1 with a service user to help understanding and compliance, or alternatively contributing to a multidisciplinary team meeting (MDT) to support rational prescribing.

Training & Development

We are passionate about providing effective training for all aspects of managing and administering medicines, medicine regulation & standards, and specialist medicines training.

Training can be provided in a traditional classroom manner, via workshops, 'working-at-lunch' sessions, or even utilising one of our on-line webinars.
